

Consolidated Accounts

The Consolidated Accounts with notes are accessible from the sub-menu which is available from the menu to the left.

All notes to the Consolidated Accounts can be viewed as pop-ups directly accessible from the primary accounts. Using the pop-up function, it is possible to look through all the notes while keeping the primary accounts readily available and in sight. It is possible to copy-and-paste directly from the pop-ups.

Alternatively all notes are individually available from the links named Note 1 through 30, where they can be printed or converted to PDF.

You can also download PDF version [here](#). Please note that the PDF version does not include graphical presentations, images or multimedia content available in the online version.
